

Product name	Cyclohexanecarboxylic acid	
Chemical name	Cyclohexanecarboxylic acid	
Molecular formula (M.W.)	C ₇ H ₁₂ O ₂ (128)	Structural formula of Cyclohexanecarboxylic acid
ENCS No.	3-3310	
CAS RN [®]	99-89-5	
EINECS No.	202-711-3	
TSCA	Listed	

Applications	Raw materials for pharmaceuticals, agricultural chemicals and functional chemicals etc.
Feature/Function	Since cyclohexanecarboxylic acid has a carboxyl group, it undergoes ester, amide, acid chloride and other chemical reactions to produce various derivatives. It can be used as a raw material for medicines, agricultural chemicals, functional chemicals, etc.
