

Product name	RIKACID TDA-100	
Chemical name	Tetralinedicarboxylic anhydride	
Molecular formula (M.W.)	C ₁₆ H ₁₂ O ₆ (300)	Structural formula of TDA-100
ENCS No.	5-6003	
CAS RN [®]	13912-65-7	
EINECS No.	Unlisted	
TSCA	Listed	

Applications	Acid anhydride for polyimide resin raw material etc.
Feature/Function	<p>Excellent in solvent solubility and colorless polyimide resin can be obtained.</p> <p>It features high heat resistance and excellent electrical characteristics.</p> <p>It can be used as a raw material for water-based polyester resins and plasticizers.</p> <p>It is a stable acid anhydride with almost no hygroscopicity.</p>
