

Product name	RIKARESIN HBE-100	
Chemical name	Polymer of 4, 4'-isopropylidenedicyclohexanol and 2-(chloromethyl)oxirane	
Molecular formula (M.W.)	C ₂₁ H ₃₆ O ₄ (353)	Structural formula of HBE-100 (Major ingredient)
ENCS No.	7-1282	
CAS RN [®]	30583-72-3	
EINECS No.	NLP NO.500-070-7	
TSCA	Listed	

Applications	Special epoxy resin etc.
Feature/Function	It is a special epoxy resin whose main component is hydrogenated bisphenol A diglycidyl ether. It has high transparency, low viscosity and good workability. An alicyclic epoxy resin with excellent weather resistance, arc resistance and tracking resistance, suitable for solvent-free paints and electrical insulation materials. Used in LEDs and coating materials.
