

Product name	RIKARESIN DME-100	
Chemical name	Cyclohexanedimethanol diglycidyl ether (Major ingredient)	
Molecular formula (M.W.)	C ₁₄ H ₂₄ O ₄ (256)	Structural formula of DME-100 (Major ingredient)
ENCS No.	Small volume	
CAS RN [®]	71463-68-8	
EINECS No.	238-098-4	
TSCA	Listed	

Applications	Special epoxy resin etc.
Feature/Function	It is an alicyclic epoxy resin that is useful as a diluent with low viscosity and low T _g drop, has excellent weather resistance, mechanical properties, and electrical properties, and is suitable for electrical insulating materials, adhesives, paints, etc. It is also used in LEDs and coating materials. Since it has excellent impregnation properties, it is also used for FRP molding and casting.
