

Product name	RIKACID TMEG-600	
Chemical name	Trimellitic acid, ester with ethylene glycol	
Molecular formula (M.W.)	C ₂₀ H ₁₀ O ₁₀ (Average molecular weight 414)	Structural formula of TMEG-600
ENCS No.	7-705/3-1362	<p>(Mixture)</p> 
CAS RN [®]	71342-70-6/552-30-7	
EINECS No.	275-346-0/209-008-0	
TSCA	Listed	

Applications	Powder epoxy resin curing agent etc.
Feature/Function	<p>It is used as a raw material/additive for paints and a curing agent for powdered epoxy resins. Improves heat cycle property, thermal shock resistance, shock resistance, adhesion, flexibility, and electrical insulation.</p> <p>The powder particles are smaller than TMEG-500.</p>
