

Product name	RIKALANOL
Chemical name	Reduced lanolin
Reference Number in Gazetted List in Japan	JSQI 2006 (cosmetic: hydrogenated lanolin; quasi-drug: reduced lanolin)
CAS No	8031-44-5
EINECS No.	232-452-1
TSCA listed	Listed

Applications	Cosmetic ingredients, Quasi-drug raw material
Feature/Function	RIKALANOL is reduced lanolin obtained by high-pressure hydrogenation of lanolin (wool wax). With a favorable water-holding property, it is used as a cosmetic ingredient for hair wax, cream, milky lotion, lip stick, etc. or a pharmaceutical raw material, and its high quality is highly evaluated overseas as well.

Representative properties			
Appearance, shape, etc.	Light yellow /Solid	Hydroxy value	130 - 160
Saponification value	6 ≥	Melting point (elevation) (°C)	48 - 55
Iodine value	18 ≥	Color number (Hazen)	200 ≥

Package form	60 kg can; 200 kg drum
